

ARES Framework – Security Domain Classification

Evaluate and rank security domains based on:

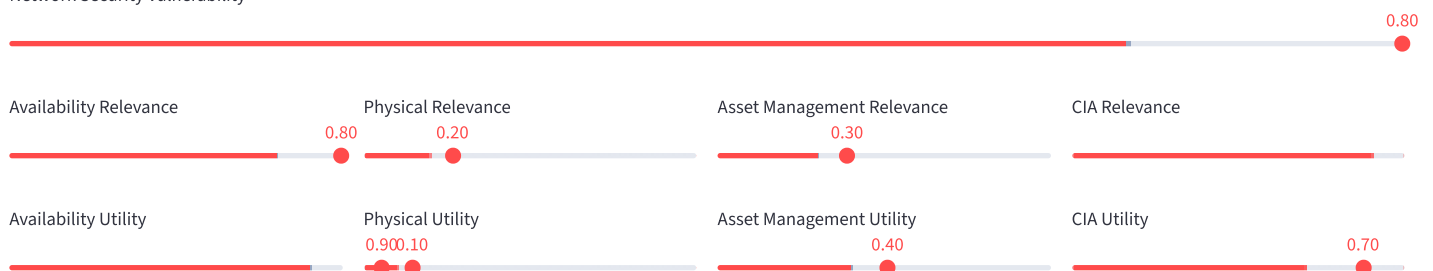

- Risk factors
- Vulnerability
- Relevance
- Utility
- Interdependencies

Security Domain Inputs

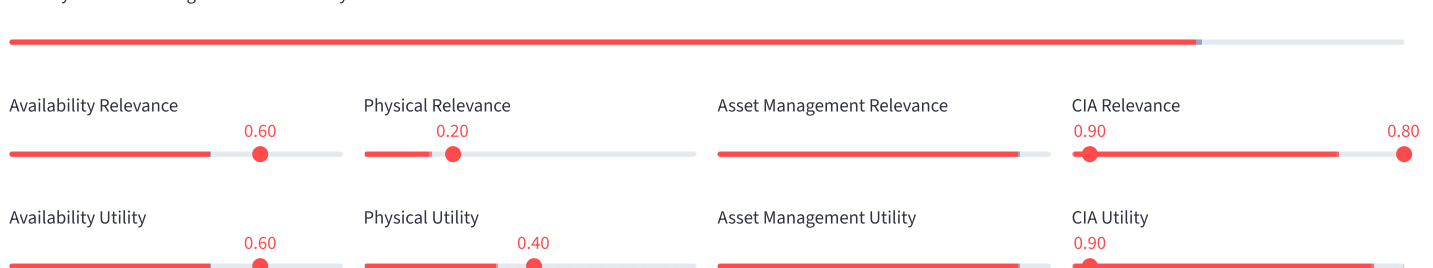

Network Security

Network Security Vulnerability

Identity & Access Management

Identity & Access Management Vulnerability

Cryptography

Cryptography Vulnerability

Security Operations

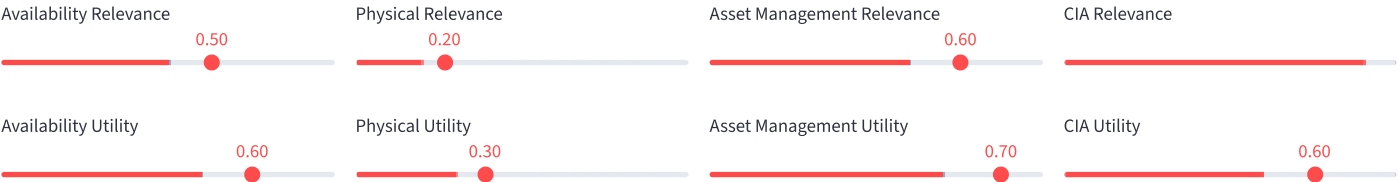

Security Operations Vulnerability

Security Awareness

Security Awareness Vulnerability

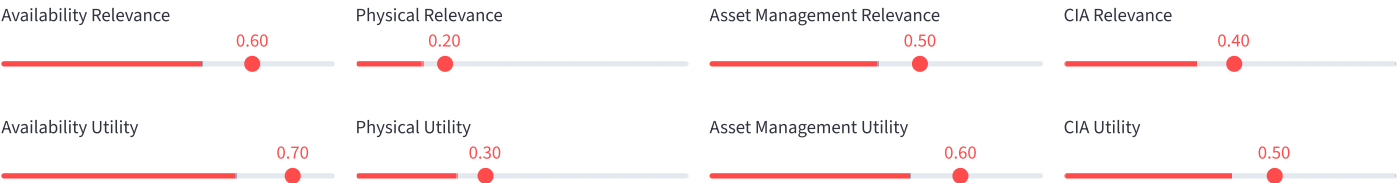

Critical Infrastructure

Critical Infrastructure Vulnerability

Threat Intelligence

Threat Intelligence Vulnerability

Risk Analysis

Risk Analysis Vulnerability

Physical Security

Physical Security Vulnerability

Supply Chain Security

Supply Chain Security Vulnerability

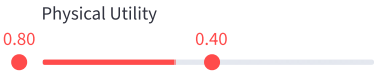

Availability Relevance

Asset Management Relevance

Availability Utility

Asset Management Utility

CIA Utility

Interdependency Matrix (D)

Positive values = supporting influence

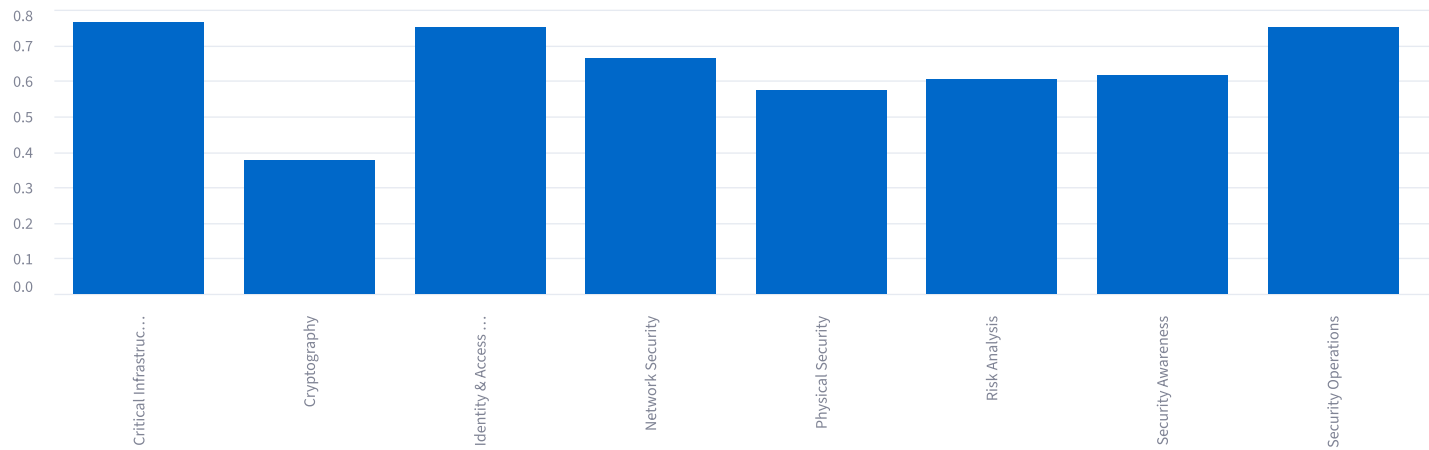

Negative values = inhibiting influence

	Network Security	Identity & Access Management	Cryptography	Security Operations	Security Awareness	Critical Infrastructure
Network Security	0	0.3	0	0.4	0	
Identity & Access Management	0.25	0	0.2	0.35	0.3	
Cryptography	-0.05	0.07	0	0.15	0	
Security Operations	-0.2	0.4	0	0	0.25	
Security Awareness	0	0.3	0	0.25	0	
Critical Infrastructure	0	0	0	0.3	0	
Threat Intelligence	0.35	0	0	0.5	0	
Risk Analysis	0	0.3	0	0	0.2	
Physical Security	0	0.4	0	0	0.15	
Supply Chain Security	0	0	0	0.3	0.2	

Ranked Security Domains

	Security Domain	Score	Classification
0	Critical Infrastructure	0.7644	Critical
1	Security Operations	0.7502	Critical
2	Identity & Access Management	0.7492	High
3	Supply Chain Security	0.6956	High
4	Network Security	0.6641	High
5	Security Awareness	0.6165	High
6	Risk Analysis	0.6037	High
7	Threat Intelligence	0.5757	Medium
8	Physical Security	0.573	Medium
9	Cryptography	0.3763	Low

Domain Scores

 Objective Risk Weights

	Objective	Weight
0	Availability	
1	Physical	
2	Asset Management	
3	CIA	

 Security Dependency Graph

Security Domain Dependency Network

Classification Summary

Critical	High	Medium	Low
2	5	2	1
